

List of next generation immunodeficient mice

BRG-nude (BRG-nu)	
Strain name	C.Cg-Foxn1<nu> Rag2<tm1Fwa> Il2rg<tm1Sug>/Jic
Strain description	Hairless BRG mouse
Strain development	BRG mice were crossed with BALB/cA-nu to introduce the nu trait. The F1 was backcrossed to BRG to establish the BRG-nu line.
Research application	useful to generate patient derived xenografts
References	Suemizu H. et al. (2013) A versatile technique for the in vivo imaging of human tumor xenografts using near-infrared fluorochrome-conjugated macromolecule probes. PLoS One. Dec 17;8(12):e82708.
